TOWN OF GREECE FLOOD PREPARATION & SAFETY

William D. Reilich
Supervisor

BE PREPARED BEFORE A FLOOD!

- If you do not have a flood insurance policy, contact your insurance agent today. If you have purchased a policy, consult with your agent and ask questions to make sure you have the proper amount of coverage.
- Copy important documents (mortgage papers, deeds, bank information, insurance paperwork, etc.). Keep copies in your home and store originals.
- Take photos of your possessions (furniture, antiques and collectibles, etc.). Store copies with your other important documents.
- Make an itemized list of all other possessions.
- Check your emergency kit (batteries, candles, flashlights, etc.) and replenish any items missing or in short supply, especially medications or other medical supplies. Keep it nearby.
- Move your furniture and valuables to higher floors in your home.
- Keep a minimum of three (3) days' supply of nonperishable food and bottled water on hand.
- Turn off power, water, and gas and take your cellular phone and chargers.
- If needed, be prepared to evacuate quickly. Know your routes and destinations.

BE PREPARED DURING A FLOOD!

- Do not walk through a flooded area. Just six (6) inches of moving water can knock you off your feet.
- Do not drive through a flooded area. A car can be carried away by just two (2) feet of water.
- Keep away from downed power lines and any other electrical wires.
- Continue to monitor your emergency kit and medical supplies and keep them nearby.
- Continue to secure any hazardous items.

**IN THE CASES OF EMERGENCY, DO NOT
HESITATE TO CALL 911!**

WHAT TO DO AFTER A FLOOD!

- Return home only when authorities indicate it is safe. Stay out of any building if it is surrounded by flood waters.
- Stay away from downed power lines, and report them to RG&E.
- **USE EXTREME CAUTION.** Check for structural damage before entering our home. If you suspect damage to water, gas, electric, or sewer lines, contact authorities.
- Remove wet contents like carpeting, furniture, and bedding immediately but keep swatches for the insurance adjuster. Mold can develop within 24 to 48 hours. Use dehumidifiers and air-conditioners to dry out the building.
- Photograph and list all damaged or lost items, including their age and value where possible. Take photos of water in the house. Adjusters need evidence of the damage to prepare your estimate.
- Plan before you repair. Contact the Technical Services Department (585) 723-2354 or visit in person at the Service Mall Entrance of Town Hall to get information on local building code requirements.
