Rental Properties within the Town of Greece must comply with Chapter 162A of the Code of the Town of Greece. If you have any additional questions, please contact 585-723-2354.

Additional third-party certifications may be required prior to obtaining the Certificate of Compliance (at the discretion of the Building Inspector.)

1. **General Information**
   Any property or dwelling unit being used as a rental property requires a permit through the Technical Services Department.

2. **Why Do I Need a Permit?**
   All Permit applications and inspections are based on local and state codes which ensure the preservation of property and the protection of life.

3. **Where Do I Get a Permit?**
   A property owner, or his/her agent (property manager), may apply for a Rental Permit at the Building Counter at the Greece Town Hall, 1 Vince Tofany Blvd, weekdays from 9am-5pm or online at the Town of Greece website. (www.greeceny.gov).

4. **Permit Submittal**
   From the applicant, a completed permit application must be submitted for the issuance of a Rental Permit.

5. **How Long Does It Take to Get a Permit?**
   All permit applications are handled on a first come, first served basis. Arrangements for inspections should be made as soon as possible to confirm the safety of the property. Inspections will be performed prior to the issuance of a Certificate of Compliance.

6. **Inspections**
   An inspection of the premises is required within 90 days of the issuance of the Rental Permit. At the time of inspection, the applicant will be notified of any issues that will need corrections. Once corrections are made, a Certificate of Compliance will be issued and is valid for a period of three years.

7. **Scheduling and Inspection**
   To schedule an inspection, please call the Town of Greece Code Compliance Office at 585-723-2354 along with any other Rental questions.

8. **Fees**
   Rental Permits are $150 per dwelling. If there are any additional units on that property, there will be a $10 fee add on per unit. An application must be completed and submitted to the Technical Services Department at 1 Vince Tofany Blvd.

Smoke Detectors
In accordance with the requirements of the New York State Residential Code, smoke detectors shall be required in all dwelling units. Smoke detectors shall be installed in the following locations: in each sleeping room, outside of separate sleeping area in the immediate vicinity of the bedrooms, on each additional story of the dwelling, including basements (but NOT including crawl spaces and uninhabitable attics.) In dwellings or dwelling units with split levels and without an intervening door between the adjacent levels, a smoke alarm installed on the upper level shall suffice, provided the lower level is less than one full story below the upper level. Smoke alarms shall be permitted to be battery operated when there is no proposed repair, alteration, change of occupancy, addition or relocation to the dwelling unit(s) in accordance with the NYS Residential Code.

Carbon Monodixe Detectors
Amanda's Law, which went into effect on February 22, 2010, preserves public safter by clarifying requirements for carbon monoxide alarms. All carbon monoxide alarms shall be listed and labeled as complying with UL 2034 or CAN/CSA 6.19 and shall be installed in accordance with the manufacturer's installation instructions and the New York State Building Codes. Battery operated or "plug in" type carbon monoxide alarms are acceptable when "hardwiring" of such devices is not viable. There must be a carbon monoxide detector per this code.

General Items to be Reviewed in the Inspection of a Typical Rental Property

Building Exterior

• Roof waterproof and maintained • Walls, foundations, chimney maintained • Doors and windows maintained • Porches solid and maintained • Guardrails on porches over 30" high/handrails on stairs • House numbers • Yard free of debris and junk • Accessory structures maintained • Pool maintained and secured • Unlicensed vehicles

Building Interior

Emergency Systems
• Carbon monoxide detectors per code (one on each level including a full basement) • Smoke detectors per code (one on each level including a full basement, inside each sleeping room, and outside of each sleeping room)

Electrical Systems
• Exterior services lines secure and protected • Switches, outlets and fixtures are operable • Adequate access and clearance around panel box

Mechanical Systems
• All ductwork and venting will be properly sealed and functional • All gas piping per code • Gas inserts and fireplaces present/operable • Heating equipment is able to maintain 68ºF

Plumbing Systems
• Installed correctly with no leaks or drips • Functioning drains, proper trips and covers • Backflow prevention present as required • Cross connections

Habitable Spaces
• Walls, floors and ceilings intact and maintained • Unobstructed egress within and out of home • No rubbish or garbage accumulation, infestations • Interior doors intact and operable • Exterior windows intact and operable • Handrails and guards

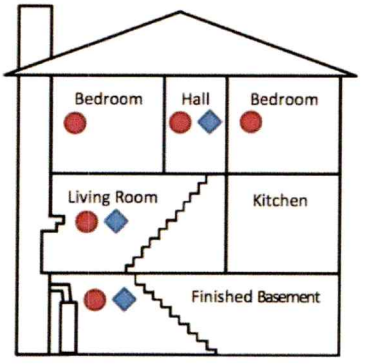
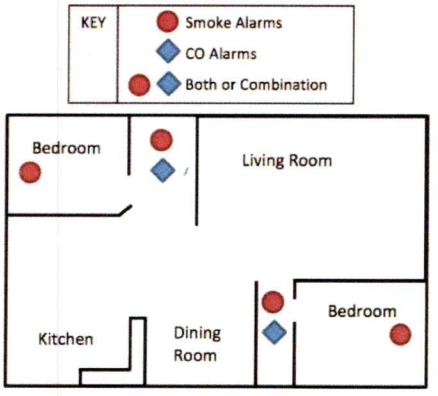
SMOKE and CARBON MONOXIDE ALARM REQUIREMENTS



Multi Story Residence



Single Story Residence

Whenever interior alterations, repairs, additions or conversions requiring a permit occur, or when one or more sleeping rooms are added or created in existing dwellings, the individual dwelling unit shall be provided with smoke and carbon monoxide alarms, as required for new dwellings. The required smoke and carbon monoxide alarms must be hardwired (120 volt) with battery backup and interconnected. The alarms shall be clearly audible in all bedrooms over background noise levels with all intervening doors closed.

Exception: Where smoke and carbon monoxide alarms are missing and are not previously hardwired on the basement, first floor and second floor.
Newly installed smoke and carbon monoxide alarms shall be permitted to be 10 year sealed lithium battery operated.

This exception only applies when there is not any electrical work associated with the basement, first floor and second floor.

Smoke alarms are required to be installed in the following locations:

1. In each sleeping room.
2. Outside each separate sleeping area in the immediate vicinity of the bedrooms.
3. On each additional story of the dwelling, including basements and cellars, but not including crawl spaces and uninhabitable attics.

Carbon monoxide alarms are required to be installed in the following locations:

1. On any story of a dwelling unit or sleeping room where fuel-fired appliances and equipment, solid-fuel burning appliances and equipment, fireplaces or attached garages are located.

Combination smoke and carbon monoxide alarms are permitted, provided the alarm is listed for such use and has distinctly different alarm signals for smoke or carbon monoxide alarm activation.
